Pre-Anesthetic Blood Testing Consent Form

Please read carefully and sign

Like you, our greatest concern is the well-being of your pet. Your pet is scheduled for anesthesia and/or surgery. Before placing your pet under anesthesia, we will perform a full physical examination. We also recommend that a pre-anesthetic blood profile be performed to maximize patient safety and alert the doctor to the presence of dehydration, anemia, infection, diabetes and/or kidney or liver disease which could complicate the procedure. These conditions may not be detected without a pre-anesthetic profile. These tests are similar to those your own physician would run if you were to undergo anesthesia. In addition, the results of these tests may be useful if your pet's health changes to develop faster, more accurate diagnoses and treatments.

- EKG (Heart) Cost - \$32.80

- Healthy patients under 6 years of age Cost - \$41.50
Includes: ~BUN (Kidney) ~ ALKP (Liver) ~ Glucose (Sugar) ~ Total Protein (Hydration) ~ ALT (Liver) ~ Creatinine (Kidney), Electrolytes (Potassium, Sodium & Chloride) & Complete Blood Count (Anemia, Infection)
